² For the criterium of professional competence at least one of the above persons must fulfil this criterium.

Dutch regulation for collectors, transporters, dealers or brokers of waste

Companies which collect or transport waste (industrial or hazardous) on a professional basis or which arrange for disposal or recovery of waste (industrial or hazardous) for others must be registered on the Dutch list of collectors, transporters, dealers and brokers of waste (VIHB-list). Besides it makes no difference whether the waste is carried by road, rail or waterway. Also foreign companies carrying out these activities in the Netherlands should be registered on the VIHB-list. The VIHB-list of registered collectors, transporters, dealers or brokers of waste is published on the website of NIWO: www.niwo.nl/vihblijs.

Registration on the VIHB-list

The Minister of Infrastructure and Environment has designated the NIWO as the authority responsible for dealing with the application for registration on the VIHB-list. A company must fulfil criteria to be registered:

- **reliability** - certificate of good repute;
- **professional competence** - only if activity is just dealer and/or broker;

Application for registration on the VIHB-list

There is a special application form for registration on the VIHB-list. This application form must be submitted to NIWO.

1. Transport companies licensed under the Dutch Road Haulage Act automatically satisfy these criteria. They will be listed as soon as NIWO receives their application form.
2. Transport companies established in other Member States (EU) and countries party to the European Economic Area (EEA) Agreement satisfy the criteria when they possess a valid community transport licence (Regulation EC No. 1072/2009 - road haulage). They must enclose with the application form an extract of the registration at the Chamber of Commerce and a copy of the community transport licence.
3. In other cases companies need to comply with the criteria. They must enclose with his application form the following documents:
 - an extract of the registration at the Chamber of Commerce;
 - a certificate of good repute (not older than three months), issued by the authority in their country;
 - if activity is just dealer and/or broker: a certificate of professional competence on waste, issued by the authority in their country.

Validity of the registration on the VIHB-list

This decree VIHB is valid for an indefinite period. Companies must comply with the stipulated conditions to remain registered on the VIHB list, as was the case at the start of the registration. NIWO will periodically review the companies which already have a registration, possible without asking the relevant company. Changes within the company (such as change of owner or director, change of waste coordinator, change of legal form, etc.) must be reported to NIWO. Afterwards NIWO will make these changes.

A registration will be ended if the collector, transporter, dealer or broker of waste:

- requests a cancellation;
- has provided incorrect data;
- ceases to satisfy the criteria.

Questions about the application for registration on the VIHB-list you can send to vihb@niwo.nl.
